April 12

Transportation is a basic need in our daily lives and the transportation industry is vital to the economy. For the past 100 plus years, cars and buses have been the primary mode of transportation for most people. Many technologies being developed will improve the safety and efficiency of these vehicles. Self-driving technology promises to drastically reduce collisions and improve mobility for many, including seniors and disabled people. Exciting developments and their widespread impacts will be discussed.

Dr. Eddie Y. Chou, PhD., P.E. is Professor of Civil Engineering and Director of the Transportation Systems Research Laboratory at the University of Toledo. He has been a transportation engineering researcher for over 30 years, and has conducted numerous research projects for various agencies including US DOT, Ohio DOT, City of Toledo, among others.

## **Introducing Canada, Our Northern Neighbor**

May 10

Come on, isn't Canada *really* just like the United States? Why should we learn more about our northern neighbor and its outlook on the world? As tensions between the US and Canada have grown in recent years, it's important to think about our shared and divergent interests. Northwest Ohio and southern Michigan have extensive links to Canada—concerning trade, security, the environment, and culture—so why aren't we getting along?

Join Dr. Rebecca Mancuso for a crash course on Canada that will help you appreciate our neighbor and its importance to us. Dr. Mancuso is an Associate Professor of History at Bowling Green State University who has taught and written on Canada for 25 years. She promises that after the seminar, you'll be able to hold an informed conversation with any Canadian you meet.

Come see a live production at the Purple Rose Theater.

Lunch at the Common Grill is always a treat. A modern American bistro showcasing creative food and small-town charm, the Common Grill has been presenting fresh, imaginative American dishes for over 25 years.

### **Ford Day: From the Model T to the F150's**

The Ford Rouge Factory Tour offers awe-inspiring encounters with America's celebrated manufacturing past, present, and future. From walking through a real-life truck plant to viewing the "living roof," you'll enjoy some eye-opening encounters with technology of today while learning about the world-changing past. Get an inside look at the making of Ford's F-150 truck, and rev up your inner engineer as you experience a real factory floor in operation. Our tour includes a film featuring historic footage from the Henry Ford archives, including the triumphs and tragedies that took place at the Rouge and how Henry Ford's soaring ideas became actualities and helped define American manufacturing and industry.

The tour also includes a visit to the "living roof" on top of the final assembly building. At 10.4 acres, it is one of the largest living roofs in the world. Offering many advantages over conventional tar and metal roofs, the sedum plants grow in a four-layer, vegetated mat, rather than in loose soil.

Celebrate the 50<sup>th</sup> anniversary of the moon landing! The Armstrong Air & Space Museum serves not only as a repository of Ohio's aeronautical history and a monument to Ohio's contribution to aviation and space exploration, but also as a tribute to Ohioan Neil Armstrong, whose "one small step for a man" was indeed a "giant leap for mankind." Designed to look like a futuristic moon base, the museum contains a range of artifacts, from Neil Armstrong's space suits to an entire Gemini VIII capsule to an actual moon rock. Learn from docents, interactive exhibits, three simulators, and the Astro Theater, a unique venue showing a 25-minute documentary about Apollo 11's lunar landing.

### **National Veterans Memorial & Museum**

Start the day with a visit to the Great Southern Hotel, a Victorian landmark hotel listed on the National Register of Historic Places. After major renovation and restoration, the hotel has earned its place among Ohio's finest historic hotels. The lobby is a sophisticated gem; the original marble front desk is still a focal point, with two amazing griffin-like figures that flank both ends. Opening the doors to the historic hotel's ballroom reveals a stunning space illuminated by five great stained glass windows near the ceiling, depicting symbols of hospitality and fine dining.

After touring the Great Southern Hotel, see the sights in Columbus during a driving tour. Highlights of downtown Columbus include the Ohio Statehouse, the old department stores and restaurants, the vibrant Short North neighborhood, Goodale Park and more. Return to the Great Southern for a gourmet lunch worthy of its heritage.

The National Veterans Memorial and Museum opened in 2018 to much acclaim. It is a place dedicated to the veteran's experience. It is a place to celebrate and honor the sacrifice of all of our veterans, past and present, from our Greatest Generation to our recent heroes coming home from Afghanistan and Iraq. Inside the museum, exhibitions focus on the people – the soldier, sailor, airman, Marine, Coastguardsman and their families – from answering the call to life after military service. Individual stories and shared experiences are illustrated through personal artifacts, quotes, letters, imagery and powerful films of veterans telling their unique story in their own words. Docents will guide our group through the first floor exhibition gallery and there will be time to explore the upper levels at your own pace. The National Veterans Memorial and Museum connects historical events to current concerns and strengthens understanding and respect between civilians and veterans.

Thursday, November 14. Bus departs from Lourdes University parking lot M at 7:30 am and returns about 7:00 pm. Price is \$128 for members, \$148 for nonmembers, and \$116 for veterans.

History lovers and poetry lovers alike will be enlightened, amazed, and moved by exploring one of the most dynamic periods in our history through the eyes of America's gifted poets. In the wake of the Civil War's devastation, the nation underwent dramatic change. As we move through Reconstruction, the Gilded Era, and the dawn of the 20<sup>th</sup> century, we will learn, among other things, about Little Big Horn and Wounded Knee; the struggle for equality among freedmen and women; the Victorian obsession with death; Americans' love affair with the circus and baseball; the labor and suffrage movements; the Spanish American War; Kitty Hawk, and the chaos of World War I. History will be illuminated through the lives and poems of famous writers like Dickinson, Stephen Vincent Benet, and Sandburg as well as works of men and women with whom you may be less familiar. This is an odyssey that will captivate you.

Dr. Shari O'Brien earned an M.A. from UM and a doctorate from BGSU. After graduating magna cum laude from UT College of Law, she worked in United States District Court. On May 19, 1845, British Naval Captain John Franklin left England with a crew of 133 men aboard two of the most well-equipped ships of the day, the *Erebus* and the *Terror*, in search of the fabled Northwest Passage. Five men were sent back to England at Disko Bay due to illness, and 129 men sailed into oblivion. Although the expedition carried enough provisions for at least three years, none of them were ever seen again.

What happened to John Franklin and his crew? This mystery baffled historians for 169 years until 2014, when the *Erebus* was finally found. The *Terror* was found two years later. Join us as we uncover the mystery of the largest loss in British naval history at the time.

Ruthi Mitchell is a 2013 and 2016 graduate of Lourdes University with a BA in English and an MA in Theology, respectively. A self-proclaimed “research rat,” she has made a lifetime hobby of digging into history’s stories, both the famous and the obscure. ### **Wagner’s Ring: a Crash Course**

Dr. Christopher Williams

3:30 – 5:00 pm, Mondays  
April 29 – May 13 (3 weeks)

Richard Wagner’s 4-opera cycle *Der Ring des Nibelungen* (The Ring of the Nibelung) is, without doubt, one of the most imposing, influential, and, yes, popular large-scale artistic projects ever completed. The *Ring* persists as a core repertory item in nearly every major opera company around the world. Its web of musical motives, techniques for their development, and deep psychological insights formed the bedrock of 20<sup>th</sup> century film music and influenced modern psychology and philosophy. There was not a major composer in the Western tradition who remained untouched by Wagner for the next 75 years. The work is as rich, persistently relevant, and subject to various interpretations as it is big. But, as transformative as he was, Wagner’s legacy was tainted by his own toxic attitudes to many issues outside of music, as well as to the use his music was put in the 20<sup>th</sup> century.

This class will provide an overview of Wagner’s four operas, their place in his career and in musical history, and their impact on culture from Bugs Bunny to the books of J.R.R. Tolkien to modern film music. Controversies involving the composer will be addressed in a clear-eyed manner.

## **What Americans agree on when it comes to health**

February 12

We may not be as deeply divided as we think -- at least when it comes to health, says Rebecca Onie. In a talk that cuts through the noise, Onie shares research that shows how, even across economic, political and racial divides, Americans agree on what they need to live good lives -- and asks both health care providers and patients to focus on what makes us healthy, not what makes us angry.

Rebecca Onie is a nationally recognized leader in the intersection of social determinants, population health and health care delivery. A MacArthur "Genius" awardee and a member of the National Academy of Medicine, Onie received her JD from Harvard Law School.

## **A solution to gun violence found in US history**

March 12

Guns weren't always the contentious issue they are today in the US. Forty years ago, guns were primarily used for sport and recreation, and mass shootings were a rarity. Much has changed since then, and while there's a lot of debate around how to put an end to gun violence, there has yet to be a solution that everyone can agree on. Gun safety advocate David Farrell thinks he has the answer, and takes us through America's history to get there.

David Farrell saw his share of weapons during his service as a nuclear, biological and chemical warfare specialist during the first Gulf War. During that time, he was selected to help dispose of the WWII stockpile of chemical weapons. Farrell's fascination with the history of gun legislation has led him to rethink the entire conversation about gun control.

## **The surprising solution to ocean plastic**

April 9

Can we solve the problem of ocean plastic pollution and end extreme poverty at the same time? That's the ambitious goal of The Plastic Bank: a worldwide chain of stores where everything from school tuition to cooking fuel and more is available for purchase in exchange for plastic garbage -- which is then sorted, shredded and sold to brands who reuse "social plastic" in their products. Join David Katz to learn more about this step towards closing the loop in the circular economy. "Preventing ocean plastic could be humanity's richest opportunity," Katz says.

David Katz is founder and CEO of The Plastic Bank, the world's only organization to monetize plastic waste and provide an opportunity for the world's disadvantaged to collect and trade plastic waste as a currency.

## **What we can do about the culture of hate**

May 14

We're all against hate, right? We agree it's a problem -- their problem, not our problem, that is. But as Sally Kohn discovered, we all hate -- some of us in subtle ways, others in obvious ones. As she confronts a hard story from her own life, she shares ideas on how we can recognize, challenge and heal from hatred in our institutions and in ourselves.

Sally Kohn is a columnist and a political commentator for CNN and former contributor to Fox News. She deeply believes in finding our common humanity, political differences aside. Before we can achieve political correctness, we must first establish emotional correctness — and this will ignite conversations that lead to real change.
